Preface:

BRS Student Link is a monthly newsletter that carries reflections of students at BRS. It's a platform provided by BRS for students to exhibit their talents, challenges and reflection on their learning process inside and outside the classroom. The newsletter is a digital communication medium to encourage all the students to express their views and talents

From the Publication Team.....

On behalf of the editorial Team, we want to take this opportunity to thank each and every member of the editorial team, who has left no stone unturned in creating such a well-organized student link. We hope that you all enjoy reading student link. Endeavour, caliber and dedication are the most important key factors behind a successful work. We feel proud to declare that with the support of our students and worthy editorial team we are able to issue the student link.

Exam Fear

Oh!!! It's Examination....
 Must study with concentration.
 When exams are near
 They cause a great fear
 Because things aren't clear
 And some subjects aren't dear
 English with it's punctuation
 Mathematics with it's calculations
 General Science with it's information
 Moral Science with moral it's values
 Oooooopsssss....
 How to learn???
 How to learn???

I wish there would be some days without exams...
 I dream for some days without exam fear...

The Nature Poem

Nature is a beauty,
 That was found everywhere.
 Now, man is destroying nature of its beauty,
 And it is hard to find it anywhere.
 The air we breath,
 Are from the trees.
 The water we drink,
 Are from the seven seas.
 Man doesn't realize what he is doing,
 He doesn't realize, he is destroying the air we breath,
 He doesn't realize, he is destroying the water we drink,
 He doesn't realize, he is destroying what he needs.
 Man wants to live,
 Yet wants to die.
 Every man who is alive,
 Will never realize when is his death

Poetry

That Tree

Everyone speaks about it,
whispering, gossiping, staring and wondering
at that peculiar sight that shines a light
that's very bright.

It's stygian bark is sturdy,
and is sheltered by a thick canopy of leaves,
the leaves that produces chimes,
which no other can mime,
and with a distinct shape no other has,
makes everyone stare at the conspicuous mass.

A lot of birds visit that tree,
making a lovely setting for a small home
which is the dome to the protruding happiness of the tree,
a happiness that cannot be paralleled to any other glee.

Over the ranches its branches spread
providing birds their comfy beds.
But alas! One fine day when the tree looked so gay,
the birds left away to the sparkling bay
and the bees which made the everlasting fruits,
made their mark, which is still left on the bark.

The trees heart became gloomy for,
It was a bizarre. But it still has something which is surprising -
Its pulp and the ripened fruits,
all of different sizes and colours
just like a peacocks feathers.
The fruits are the boon to the tree,
just like the stars we just see.

Elders say it's a message from the gods for,
the eerie light so bright
displays the vision of life.

Only some can see it,
which is no illusion but the reflection,
the reflection of ones path in life..

Poetry

फ़ेसबुक
 फ़ेसबुक का है ऐसा जादू ,
 जो करता है सबको बेकाबू।
 फ़ेसबुक का ऐसा मेल,
 जो पहुँचा दे अच्छे-अच्छे को जेल।
 यह है समय की बरबादी,
 उपयोग करे इसे सारी आबादी।
 तुम सही तो यह सोने पर सुहागा,
 तुम गलत तो यह खतरे से भी ज़्यादा।
 इसको चाहे पूरी धरती हमारी,
 क्योंकि इसमें है पूरी आज़ादी।
 पर दूर ले जाए हमसे,
 जो है सपना हमारा।
 है यह उचित समय अभी,
 कर दो फ़ेसबुक को बंद सभी।
 मैं पूछता हूँ तुमसे एक सवाल,
 अब क्या है तुम्हारा ख़याल।

महात्मा गांधी

देश के महात्मा कहलाते,
 सभी के चेहरों पर खुशियाँ लाते,
 वे थे बापू हमारे ।
 जिसने अंग्रेजों को देश से भगाया,
 सत्य, अहिंसा के मार्ग पर चलना सिखाया,
 वे थे बापू हमारे ।
 जिसने सोचा अपने बारे में कम,
 और देश को बढ़ाने में लगाया सारा दम,
 वे थे बापू हमारे ।
 चलो आज एक अच्छा काम करेंगे,
 खूब पढ़ेंगे खूब लिखेंगे,
 बापू के जैसे काम करेंगे ।

Poetry

परिश्रम का महत्व

इतिहास गवाह है,

काल के पन्नों में हमेशा तरक्की का मन्त्र दिखता है ।
मेहनत करने से हिमालय की चोटी भी दिख जाती है,
मुश्किल होगा काम अगर तुम उसे नज़रअंदाज़ करो,

मंजिल तक जिसको जाना है,

चाहे वह एवरेस्ट की चोटी हो या बंगाल का समुद्र तल,
फरक नहीं पड़ता अगर तुम्हें कुछ पाना है,
हाथ पे हाथ धरे तुम्हें कुछ मिलेगा नहीं,

श्रम का फल हमेशा मीठा होता है,

कामयाब हो जो सिर्फ़ उसको मिलता है,
दुनिया की सैर में कोई हारता-जीतता है,
काल को कभी पलट कर न देखो लेकिन उसे नज़रंदाज़ भी न करो।

न्यूटन के तीन लॉ, डा विन्ची का अनोखा चित्र,

शेक्सपियर की किताबें और बीरबल की बुद्धि,

पर आज भी वाह वाह होती है,

याद रखो सबके पास एक दिमाग है,

लेकिन सोच एक सी नहीं,

गुफ़रान खान- 6ई

चिड़िया घर की सैर

एक शुक्रवार में और मेरा परिवार अल ऐन चिड़ियाघर की ओर निकले। वहाँ हमने भाँति-भाँति के जीव देखे। उन्हें देखकर मुझे बहुत आनन्द आया। पक्षियों की आवाज़ मधुर थी। हाथी मस्त होकर घूम रहा था। पानी के किनारे मगरमच्छ सो रहे थे। बाघ के बच्चे आपस में खेल रहे थे। हम खुशी-खुशी सभी जानवरों को देख कर रात को घर वापस आ गए।

Field Trip

My school announced a field trip on 9th of November 2015 to Dubai. My parents granted permission to field trip. My lucky day came and I went to my field trip to Creek Park at Dubai. When we reached our destination we relaxed little and entered to the Dolphinarium where the Seals and Dolphins performed various funny shows. Those performances were really amazing. After the show we were standing in a long queue to the Mirror Maze, I dashed into the mirrors for more than ten times. The most confusing part was the exit. There were five exits four were mirrors and only one was the exit, finally I found it and came out excited. We went to the grass ground and had our lunch after that we entered the Exotic Bird show. They performed very well and it was epic. They were colourful, big, small, intelligent and funny birds. The last bird was a talking bird, its voice was funny. It was a pleasant and unforgettable journey to me. By evening we came back to Abu Dhabi, when I reached home shared all my experiences with my family and showed them the videos and pictures I captured. It was an amazing wonderful day in my life. I humbly thank my principle for organising this field trip.

5 Habits of Organized Students

- Studying and reviewing material right after lecture, every day/ evening. A little bit of daily review will help avoid late-night cramming before any test. Make a study plan
- Setting personal deadlines 3-4 days before the actual deadline. This gives some extra time for any edits or even emergencies that could come. No more “Ah, I have a 10-page essay due tomorrow!” at 11 pm anymore!

- Using a good calendar/planner/organizer will help with seeing what's coming up and due in the next weeks.
- Keeping the room and bag tidy will help with distractions and feeling of clutter in my head. This is definitely a problem and often I spent more time cleaning my room before studying than doing actual work. These are just a few things that affect our concentration.
- Prioritizing tasks. Asking yourself, what's due the earliest and what's more important to get done? What can wait? What can I do later in the evening when my head isn't working as well? What do I need to be sharp and attentive for?

How to Find Pirates' Treasure

The rewards for pirates could be great. For instance, in 1820 the *Mary Deer* landed on the Cocos Islands in the Pacific Ocean. There the crew buried 12,000 gems, 7 treasure chests of golden ornaments and 9,000 gold coins. Having buried their loot, they set fire to the ship and rowed off in longboats. However, when they reached land, they were all arrested. None of the crew could return to dig up their treasure because they were imprisoned. It has not been recovered since - though many have tried!

If I was called in to help discover pirate treasure in the Cocos Islands, I would have a number of ways to find the treasure:

First of all, I would identify all the places the treasure might have been hidden. This would include sandy areas, caves, lakes, and places where it might have been buried near the shoreline. I would check that the shoreline had not changed so that we were not looking in the wrong place!

Next, I would use diggers to dredge up all the sand and sift it so that the grains fell back onto the sand and larger objects are retained. I would also use enormous magnets to help identify any metallic objects so that I could distinguish metal from other materials.

Also, I would have a team of workers using metal detectors criss-crossing other areas near the shoreline. Any sign of metal would cause the detectors to sound and identify where we need to dig and explore further.

Finally, I would use sound waves to identify unusual objects lying below the surface because the pirates might have buried the treasure quite deep. This would also be needed because so much time has passed since the treasure was buried it could be under many layers of earth and silt.

I know it is unlikely that I will be called in to search for pirate treasure because I am not famous for discovering much. In fact, the only discovery I am known for was the time when our cat stole a chunk of Cheddar from the fridge and I found it hiding behind the kitchen door.

RIDDLES

1- I am most commonly seen in library, I always prevail with an introvert, who am i?

Answer- silence

2- Where do pens live

Answer peninsula (pen-in-sula)

3- How can you make eleven even?

Answer- take away the letter 'el' from it

4- What do the bees do with the honey?

Answer- they cell it

5- What has a mouth but can't chew?

Answer - a river

6- You can use fish to draw a line. How?

Answer- it has scales

7- What kind of nut have no shell?

Answer- a doughnut
